- Customized design elements
- Security features to prevent unauthorized access
- Interactive information for your customers
- Easy content update with an intuitive user interface
- Safe for self-service environment
- Tailor-made kiosk applications
- Integration with your data sources

A Jewelers Virtual Inventory kiosk in your jewelry store is not only a unique service center but also an ideal platform to establish a dialog with customers and employees.

INCREASE SALES

Eliminate the frustration of not having the right items in stock. Now you can show everything available from your favorite vendors and make the sales instead of excuses.

"NO THANKS, I'M JUST LOOKING"

Customers will have the opportunity to shop in your store without the feeling of being hurried or pressured.

BETTER THAN THE INTERNET

Don't just compete with the Internet, beat them. Combine your existing inventory with that of your favorite vendors and learn to sell from an empty cart.

BECOME THE TECHNOLOGY LEADER

The advanced touch screen kiosks offer an interactive way for clients to experience your store unlike any other in your market. They will be excited to tell their friends about the convenience and fun they had shopping in your store.

Category Screen. This example screen shows 20 of the available rings in the selected category.

Detail Screen. This screen displays a large photo of the item and provides detail information along with the price.

FLEXIBLE LOOK AND FEEL

The software offers an administrative module that is a do-it-yourself kiosk system that allows the jeweler to easily manage and coordinate the content of the kiosk. No programming knowledge is needed to create and edit/update menus, buttons and other design elements. Easily implement logo's, advertisements, your own inventory and other content for your personalized Jewelers Virtual Inventory kiosk.

JEWELERS VIRTUAL INVENTORY

Our track record of success and stability is the result of a comprehensive understanding of the jewelry industry. Jewelers Virtual Inventory is the leader in the design and manufacturing of touchscreen kiosks specifically developed for the jewelry industry.

Build Color. This is an example of one of the screens that allows the jewelry store to customize the look and feel of their screens. The jeweler can customize any or all of the colors of the various components of the screen.

SUPPORT

Jewelers Virtual Inventory offers a comprehensive service program to support your project from start to finish.

Turn Key Solution - With this option, we manage your complete kiosk installation process for you from hardware purchase and configuration to software installation and the loading of images.

Help Desk Support - Our Help Desk team is ready to respond to your call or email. Technical support is free for the first 90 days after purchase.
